EDUCATION

Amrita Vishwa Vidyapeetham

Bachelor Of Technology in Computer Science and Engineering

06/2021 – 05/2025

Chennai, India

PROJECTS

A COMPARATIVE STUDY OF SYMPTOM-BASED DISEASE CLASSIFICATION USING BERT, SVM, AND KNN (Research Paper)

08/2024 – 10/2024

Python, Deep Learning, Machine Learning

- Optimized model to achieve the highest accuracy of 97.1% with BERT, demonstrating superior handling of complex symptom descriptions.
- Enhanced accuracy to 96.08% using SVM, effectively managing high-dimensional data despite challenges with overlapping symptoms.
- Secured 96.96% accuracy with KNN, showing robust performance but struggling with overlapping symptoms in select diseases.
- Analyzed 1,200 records across 24 diseases and applied advanced text preprocessing, ensuring diverse training data and consistent model performance.

DIABETES PREDICTION USING MACHINE LEARNING ALGORITHMS (Research Paper)

09/2023 – 12/2023

Python, Machine Learning

- Achieved 83.2% accuracy by developing a diabetes prediction model using XGBoost, increasing accuracy from an initial 78% through hyperparameter tuning and data balancing techniques.
- Improved model sensitivity by applying SMOTE to address class imbalance, enhancing the model's sensitivity to diabetic cases and achieving an AUC of 0.81.
- Analyzed data from 203 female participants aged 18-65 at Rownak Textile Mills Ltd, integrating key health metrics like glucose levels, BMI, and blood pressure to enhance predictive accuracy.
- Resolved challenges, including class imbalance, data noise, and hyperparameter tuning, to create a reliable and robust model for diabetes prediction.

CPU SCHEDULER

10/2022 – 12/2022

Java, MySQL

- Developed software for managing process execution on a computer's central processing unit as part of the CPU Scheduler Project, achieving a 15% reduction in average task completion time.
- Directed a 4-member cross-functional team, resulting in a 20% increase in overall team productivity through improved collaboration and task prioritization.
- Utilized key efficiency metrics, such as throughput and turnaround time, achieving a 20% improvement in overall system efficiency.
- Integrated 4 process scheduling algorithms, such as First-Come-First-Serve, Shortest Job Next, Round Robin, and Priority Scheduling.

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

01/2025 – 03/2025

Devcare Solutions

- Developed a responsive Single Page Application (SPA) Movie Ticket Booking System using Angular and TypeScript.
- Implemented dynamic UI components for movie selection, seat booking, and payment processing.

SKILLS

- Programming Languages: Java, SQL, HTML, CSS, Javascript, Typescript
- Technologies/Frameworks: Angular, Bootstrap, Machine Learning, Deep Learning, OOPS, Data Structures
- Developer Tools: VS Code, Google Colab

CERTIFICATES

- People and Soft Skills for Professional and Personal Success by IBM
- Python for Data Science and Machine Learning
- AWS Academy Cloud Foundations
